

IRVANNO TAQI IRMAWAN

Product-Minded Engineer | Fintech & Payments | Exploring PM & TPM Roles

Jakarta, Indonesia (Open to International Opportunities) | +62 8119 1214 96 | hello@irvanno.com | irvanno.com

PROFESSIONAL SUMMARY

Product-minded technologist with 7+ years of experience contributing to fintech product experiences across GoTo Financial, Tokopedia, and Gojek. Experienced in operating at the intersection of engineering, quality, and product, with a track record of coordinating cross-functional initiatives, surfacing execution risks early, and aligning stakeholders around delivery. Bringing technical depth, execution rigor, and product thinking to Product Manager and Technical Product Manager roles.

CORE SKILLS

Release Readiness & Product Delivery | Cross-Functional Execution | Technical Program Coordination | Dependency Management | Fintech & Payments | Product Analysis | API & System Architecture | Stakeholder Alignment | Agile Execution | Risk-Based Prioritization

SELECTED PROJECTS

TokoFood Integration — Cross-Functional Coordination Case Study

Cross-org coordination for a post-merger product integration across two organizational structures. Risk register, dependency tracking, VP-level stakeholder communication. Launched on schedule. irvanno.com/work/tokofood

Wise: What Happens After You Hit Send — Independent Product Analysis

First-hand walkthrough of Wise's transfer experience (19 screens, real-time anxiety ratings) plus App Store review analysis. Ranked prioritization of three interventions with tradeoff reasoning and measurement criteria. irvanno.com/work/wise

PROFESSIONAL EXPERIENCE

SDET – Consumer Experience

GoPay (GoTo Financial) | Aug 2024 – Present

- Partnered with Product and Engineering teams to translate product requirements into testable implementation criteria, identifying edge cases, dependency risks, and system constraints before development.
- Influenced scope and delivery decisions by surfacing execution risks, technical tradeoffs, and customer-impact considerations during planning discussions.
- Built automated quality safeguards within GitLab CI/CD, improving release confidence and reducing regression effort across consumer-facing experiences.
- Worked across Product, Design, and Engineering to ensure fintech features shipped reliably while maintaining a high-quality user experience.

Senior SDET – E-commerce / Consumer Platform

Tokopedia | May 2019 – Aug 2024

- Led quality and release readiness for one of the earliest post-merger integrations between GoFood and Tokopedia, coordinating across multiple teams operating with different systems, infrastructure, and workflows.
- Served as a cross-functional point of coordination, communicating progress, risks, and blockers to engineering and product stakeholders throughout the integration lifecycle.
- Contributed product and implementation feedback during planning and review discussions, helping teams identify execution risks and align scope with delivery constraints.
- Reduced regression execution time by 35% through automation initiatives, enabling faster iteration on transaction-heavy experiences.
- Mentored junior engineers and established structured defect triage and risk-based prioritization practices.

EDUCATION

Bachelor of Computer Science – Universitas Indonesia | 2019
